By J. WILLIAM FULBRIGHT United States Senator From Arismass

That great and respected practitioner of bipartisan foreign policy, the late Senator Arthur Vandenberg, once wrote that every foreign policy must be totally debated . . . and the loyal opposition' is under special obligation to see that this occurs.'

The Senate has this responsibility. The American people owe it to themselves to discuss and understand the foreign policies of

am particularly concerned about the seeming apathy and. indeed, complacency with which the executive branch has contemplated successive setbacks to American interests and objectives. For that reason, I have urged a sober analysis by the United States Government, and by the American public as a whole, of the basic reasons for our deteriorating situation in Latin America and the Middle East in particular, as we'l as generally in the test of the world, including even our great neighbor to the north

The armed intervention q' United States in the Middle is only one sympton of sheep in our foreign pelicy in our foreign policies of a symptoms will nave in the cour returning former and the cour armed to. our returning to a second of our armed to.
